

## Getting Started

### Remove

Remove magnet from the Track Pro-S tag.

### Scan

Configure the Track Pro-S tag using the Track Pro App by scanning the barcode.

### Locate

The current location of the Track Pro-S will be shown in the Track Pro App.

### Sight Line

Ensure the Track Pro-S tag is outside and as good line of sight to the sky.

### Link

The Track Pro-S will start linking with communications network and be operational within 48 hours.

### Additional information

For more information on how Track Pro can help you take ownership of your assets, scan the QR code at the right.
